SUMMARY

Passionate and creative UI/UX Designer with a keen eye for detail and a strong commitment to enhancing user experiences through intuitive and visually appealing interfaces. Skilled in user research, wireframing, prototyping, and usability testing, with a deep understanding of user-centered design principles. Proficient in industry-standard design tools such as Figma. Adept at collaborating with cross-functional teams, including developers and product managers, to bring engaging digital solutions to life. Dedicated to staying up-to-date with emerging design trends and technologies to deliver innovative and impactful user experiences.

Ready to contribute to a dynamic team and help create products that resonate with users while achieving business goals.

EXPERIENCE

UI/UX DESIGNER

Code Tech IT Solutions

February 2025 - February 2025, Hyderabad

- Designed and developed intuitive user interfaces, boosting user engagement by 30% through comprehensive user testing and iterative design improvements using figma.
- Conducted extensive usability testing sessions, gathering data-driven insights that informed design decisions, resulting in a 25% increase in customer satisfaction scores for web applications.

PROJECTS

ShopSter(ecommers)

November 2024 - December 2024

- This web project is designed to enhance the online shopping experience by providing users with a convenient and user-friendly platform. It helps people explore and purchase products effortlessly by visiting the website. The platform offers a streamlined interface, intuitive navigation, and essential features to make online shopping easy and enjoyable.
- The project leverages modern web technologies to ensure a smooth and responsive user experience. It addresses common pain points in online shopping, such as product discovery, comparison, and secure transactions.
- Would you like to add more details about the features, design approach, or technologies used? If you're preparing this for your UI/UX internship, we can also highlight the usercentered design aspects.

Mustang

August 2024 - September 2024

- The Mustang car landing page project is a visually stunning and dynamic web page dedicated to showcasing the iconic Ford Mustang. Driven by my passion for Mustangs, this project highlights the car's powerful design, performance features, and rich history. The design is sleek and modern, capturing the spirit of speed and freedom associated with the Mustang brand. It includes high-quality images, interactive elements, and an engaging user experience to captivate car enthusiasts and potential buyers. This project reflects my love for Mustangs and my commitment to creating impactful digital experiences.

Painting Service

May 2024 - June 2024

- This project is focused on designing a visually appealing and user-friendly landing page for a painting service. The goal is to effectively showcase the range of painting services offered, including residential and commercial painting, interior and exterior finishes, and custom color consultations. The design will emphasize professionalism, quality craftsmanship, and customer satisfaction, with strategic call-to-action buttons to encourage inquiries and bookings. The layout will be clean and modern, ensuring easy navigation and a seamless user experience to maximize engagement and conversions.

AirPods

November 2023 - January 2024

- This project is a pixel-perfect clone of Apple's official AirPods landing page, designed to replicate its sleek UI, smooth animations, and interactive elements. Built with HTML, CSS, and JavaScript (or a framework like React, if applicable), the page features.
- **High-quality visuals** to match Apple's minimalist aesthetic.
- **Smooth scrolling and animations** for an immersive experience.
- **Responsive design**, ensuring a seamless look on all devices.
- **Interactive sections**, such as product highlights, feature breakdowns, and purchase options.
